MEMORANDUM FOR: Director of Communications  
FROM: Bruce T. Johnson  
Director of Data Processing  
SUBJECT: Cable Dissemination System (CDS)  
Replacement  
REFERENCE: Your memo dtd 9 Feb 81, same subject  
(OC-M81-108)

Our recent discussion of the Message Handling Facilities (MHF) as a replacement for the Cable Dissemination System took us an important step farther down the road of collaborative effort in this important area of message handling. I was pleased at the decision to continue with the development effort and look forward to the task force's report on the requirements for the system. Once we have a clear statement of those requirements we will be in a position to ascertain whether our IBM 370/158 computers will be suitable for the MFH. In the meantime, we will consider the 158's reserved for MFH and will not commit them permanently to any other program.

/s/ Bruce T. Johnson
